

# UNITEC FOODS

The promise of a better future with our materials and technology

Material × Technology = Smile<sup>2</sup>

# Solution Creator

Creating unique solutions by gathering knowledge about ingredients around the world and acquiring information

## Proposal of Solutions to Resolve Problems relating to New Product Development

Unitec Foods offers solutions backing up the development of new products by food manufacturers. We have established a system that not only enables us to propose new applications, but also enables us to realize the timely acquisition of product information relating to new ingredients as well as samples of overseas products and raw materials.

## Building a Close Network with Suppliers around the World

Unitec Foods has built a worldwide network of leading suppliers in countries and regions such as France, Switzerland, Germany, North and South America, and Asia. This network enables us to analyze trends both overseas and in Japan that lead to the actualization of innovative ideas based on extracting development concepts for the next generation.

# Unique Technology

**Leading Technology and Basic Research in the Food Sector We meet diverse needs through our unique development skills and proposals**

## **Food Application Performance that Materializes Next-generation Needs**

Unitec Foods has the capability to demonstrate sophisticated food applications such as jellies, custard puddings, beverages, confectionaries, and bread.

Utilizing the properties of individual ingredients, we have established the know-how to produce new characteristics through methods of usage and combinations under ideal conditions. We provide ideal proposals to meet the requirements of our customers.

## **Toward Creating and Accumulating Original Technology Based in the Foods Sector**

We have accumulated extensive know-how on production facilities, including mechanisms for gelling various ingredients and stabilization mechanisms. We will focus on applying these technologies to developments in fields such as foods for health care, foods to meet the needs of lifestyle-related diseases, and even pet foods and cosmetics.

# Quality Control

Unitec Foods pursues safety and reliability, while never compromising on quality. “Quality First” is our approach.

## Quality-control System that Meets International Standards

Unitec Foods gives priority to the safety and hygiene of imported food ingredients and food additives. Unitec Foods has acquired the certification of ISO22000 which is the international standard of the food safety management system pioneering in the industry.

**We at Unitec Foods are constantly thinking about the safety and reliability of ingredients.**

When necessary, imported products are tested, analyzed, and checked for compliance to standards. We give priority to using raw materials with special characteristics and have established a traceability system for purposes of data control to identify each product lot's manufacturing history.
